

VANILLA CO2 EXTRACTS

Organic Vanilla CO2 Extract (26% Vanillin)

Conventional Vanilla CO2 Extract (12% Vanillin)

Suitable for beauty and personal care applications.

INCI: Vanilla Planifolia (Vanilla) Fruit Extract

Extraction: CO2 Supercritical Extraction

Shelf Life: 5 Years

Origin: India

Background:

Praan Naturals offers an Organic Vanilla CO2 Extract with 26% Vanillin composition and a Conventional Vanilla CO2 Extract with 12% Vanillin composition. Both extracts are premium quality, thick, golden brown liquid aromatics that possess the deep, rich, creamy aroma of vanilla.

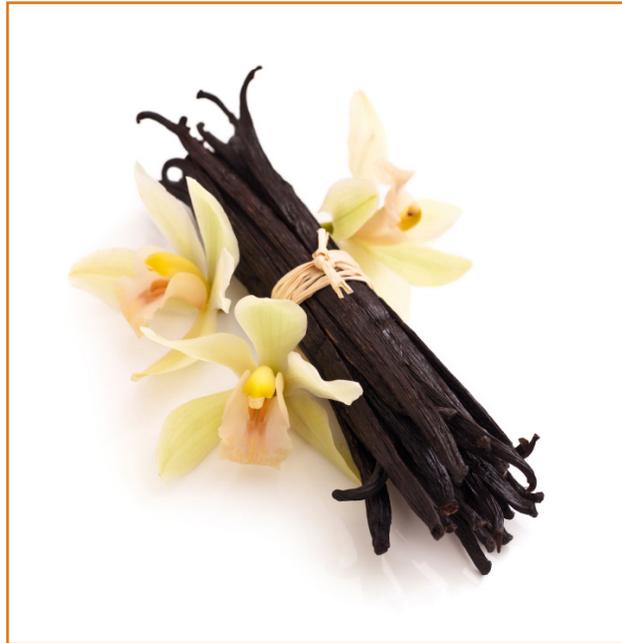

They are perfectly suited for the finest beauty, cosmetic and skin care applications where the exquisite aroma of natural vanilla is preferred over synthetic vanilla fragrances.

Praan Naturals Vanilla CO2 Extracts are produced using carefully selected, premium vanilla beans. Liquid carbon dioxide (CO2) is utilized as the natural solvent. When the CO2 is returned to its gaseous state, the pure, natural compounds present in the vanilla beans, including the highly aromatic vanillin, is retained.

Uses:

Aromatically, Vanilla CO2 Extract is considered a base note. It can help to sweeten, soften and deepen the fragrance of other aromatics.

Vanilla CO2 Extract is well suited for use in products intended for all ages and genders. The rich vanilla aroma blends especially well with essential oils and other natural aromatics within the spice, citrus, mint, floral, herbaceous and wood aromatic families.

Properties:

- Deep, Rich, Natural Vanilla Aroma
- Premium Quality
- Thick Viscosity
- Golden Brown Hue
- Free of Alcohol and Solvents
- Standardized Vanillin Composition:
 - Organic Vanilla CO2 Extract: 26% Vanillin
 - Conventional Vanilla CO2 Extract: 12% Vanillin
